Simple DIY

Christmas Tree Decor

Christmas decorations don't need to take up a ton of space or break the bank! Get creative this year, starting with this simple DIY Christmas tree decoration.

DIY Vintage Map Ornament

Materials needed:

- Hot glue gun
- Ribbon for hanging ornament
- 55 x 3" squares cut from your old map

1. Your first fold should be corner to corner to make a triangle
2. Next fold each corner up to the top of your triangle. Use a bone folder or the edge of your credit card or something to crease your lines so that they are really flat
3. This is probably the trickiest of the folds. Take those corners that you just folded up and open them up and down so that they form a kite shape
4. Then take those corners on each side and dog ear them down.
5. Last fold! Fold the kite shape in half right down the center
6. Roll the edges together and hot glue the facing sides together.
7. Repeat the folding process on 4 more squares so that you have 5 separate leaves
8. With your hot glue gun, glue each individual leaf to the other in the center. You will create a flower with your sections
9. When you have 3 flower groups completed you will glue them together as well at the outside
10. Gather your leaves together into a group of 3 and glue them together. Where each flower leaf meets another leaf, give it some glue
11. When you get a few of the groups together cut a piece of ribbon, fold it over and glue it into the center of your groups. Then continue to add your additional groups. Keep doing this until you make 11 groups of flowers and see a round ball
